Pre-Screening Questions

Software Developer · Scandinavian Software Park, Hanoi

Before we schedule a meeting, we'd love to hear from you directly. These five questions are the core of our screening - there are no right or wrong answers. We're looking for honest, specific responses from your own experience.

How to respond

- Reply to this email with your answers written inline below each question.
- Be specific - tool names, project context, outcomes. Vague answers tell us a little.
- Honest answers beat impressive ones. If something doesn't work, tell us what you learned.
- No word limit - as long or short as the question deserves.

The Questions

Q1 Depth of usage

Which AI coding tools are you currently using in your day-to-day development, and what does your typical workflow look like with them?

Your answer:

Q2 Real impact

Can you walk me through a specific feature or task where AI assistance made a measurable difference? What did your prompt, what did you get, and how much did you have to change?

Your answer:

Q3 Critical thinking

Have you ever caught an AI tool introducing a bug, a security issue, or a bad architectural decision into your code? How did you catch it, and what did you do?

Your answer:

Q4 Opinion and judgment

Where do you think AI coding tools fall short today - and what do you still prefer to do yourself without AI assistance?

Your answer:

Q5 Team & process

If a teammate on your team wasn't using AI tools yet, how would you introduce it to them - and what would you set as a realistic expectation for the first month?

Answer:
